## What is Does

A Gigabit PoE signal is created by the **OPL PoE Injector, Model PoE5530SGV-OD**, by fusing electrical power with a 5G network connection. Up to 100 metres distance, a PoE injector through ethernet cable (CAT6A) can power PD devices, such as a wireless AP, IP camera, IP phone, etc. With a maximum output power of 30W, PoE injectors are a smart option if you want to cut installation costs while enhancing network performance.
